

AI Compliance Monitoring – Agent 4 Assignment

Report Drafting Agent

Objective

Design an AI agent responsible for generating regulatory reports using validated data.

The agent should convert validated operational metrics into structured regulatory reporting formats.

Scope of the Agent

The Report Drafting Agent should:

- Map validated data to regulatory templates
- Aggregate metrics
- Generate regulatory reports

Functional Expectations

The agent should demonstrate:

- Mapping of internal data fields to regulatory reporting fields
- Calculation of aggregated values
- Generation of structured reports

Architecture & Design

Explain the report generation architecture.

Include:

- Template mapping approach
- Report generation tools
- Handling missing or partial data

Prototype Demonstration

Demonstrate generation of a regulatory report using validated data.

Deliverables

Candidates should present:

- Report template design
- Workflow explanation
- Generated compliance report
